The challenge

1 in 4

of 16 million Thai students are underserved

300,000

Students drop out of basic education ever year

Thailand ranked

50th

out of 55 countries on PISA test in 2012, putting it near the bottom of Asia

Students score 25%-30%

On average on STEM and English in the O-Net (National Exams)

At a glance :

Learn Education is Thailand's leading education technology social enterprise. Learn Education provides an innovative, online blended-learning approach to engage students through culturally relevant material and lessen overworked teachers' workloads. The organization focuses on developing public-private partnerships to develop and utilize technology that can positively impact student outcomes, motivation for learning, and quality of life. Since 2011, Learn Education has expanded to serve over 100 schools, half of which are under-served, throughout Thailand. In doing so they have supported more than 25,000 students and 200 teachers.

Key programs:

Digital Content

Learn Education uses an innovative online tool that provides context integrated textbooks, workbooks, and video lessons that adhere to Thai curriculum standards. Learn Education also helps teachers to organize pre and post tests to measure student performance and provide feedback to each student based on data-driven insightful reports.

Teacher Training

Learn Education holds 1:1 lesson planning sessions with teachers and observes the classrooms when their solution is in use. In addition, the organization brings together events to encourage idea and lesson sharing among teachers. This allows teachers to share best practices and learn from the experts in the field, while also allowing Learn Education to gather feedback from educators and continuously improve their solutions and tools.
